# INTRODUCING

A unique mix of creative and precise processes to create a healthy space, building, office or home that has a positive impact on our well-being. A multi-sensored environment, sustainability, indoor air quality, acoustic planning, healthy material choices and smart lighting, designed to bring nature closer to us.

# ABOUT

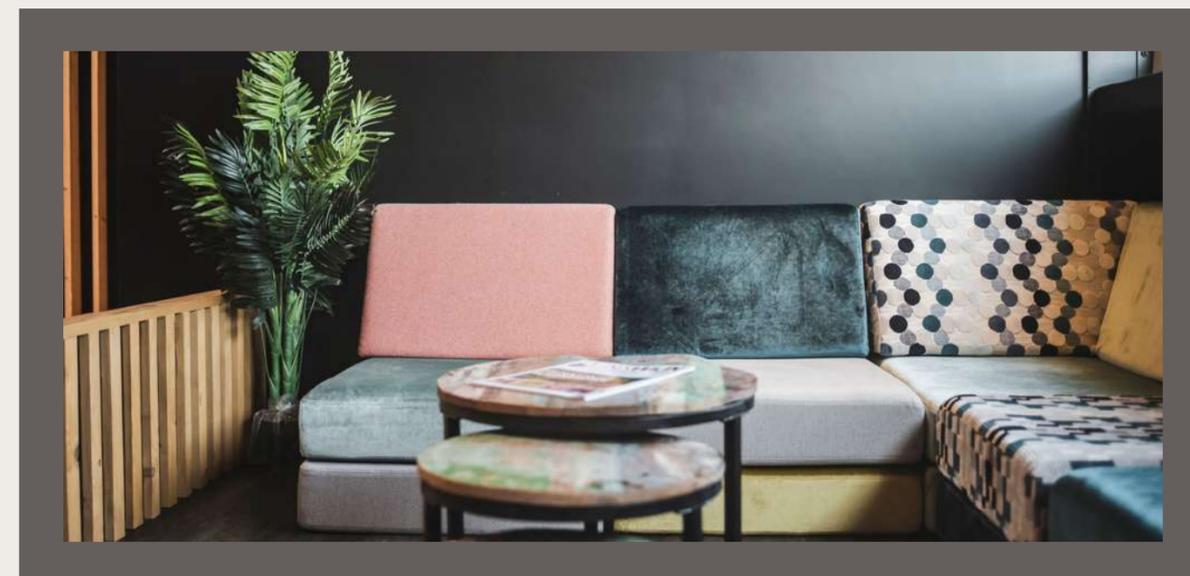

REFLAXATION

## CONNECTED WITH NATURE

We are passionate about narrowing the gap between the modern-day human and nature, by creating biophilic interiors, products and spaces. We help you to increase mental health and focus by stimulating the senses in an inspiring environment. Our aim is to work via the introduction of natural, organic, and handmade artworks.

# BIOPHILIC DESIGN

Nature + sustainability + wellness; helping people increase their productivity, self-confidence and general well-being, by providing the visual elements such as views of stunning landscapes, beautiful plants and animals, or stimulating other senses through fragrances, sounds, and airflow changes.

REFLAXATION

# CONSCIOUS CREATION

Get the passionate, playful environment you want, and we will show you how!  
Our architects and acoustic designers are happy to welcome you in one of our spaces, to plant the first seeds of your journey to create a natural environment.

# AESTHETICS & ACOUSTICS

Visual and non-visual ways of bringing nature closer to you can't exist without acoustics. Experience sound-wellness, in a multi-sensory environment that brings inspiration, focus, and energy. Sound absorbing solutions such as acoustic panels, moss walls, and micro-acoustics that reduce ambient noise while adding a natural aesthetic into a space. On top of that, high-quality audio products will reduce stress and boost your mood!

# INSPIRATION

... comes from Mother Nature. All products and spaces are designed by the shapes, patterns, and elements from nature.

# FEEL THE DIFFERENCE

Presentations, meetings, lectures, workshops, team-building, coffee breaks; experience the psycho-somatic difference in our spaces:

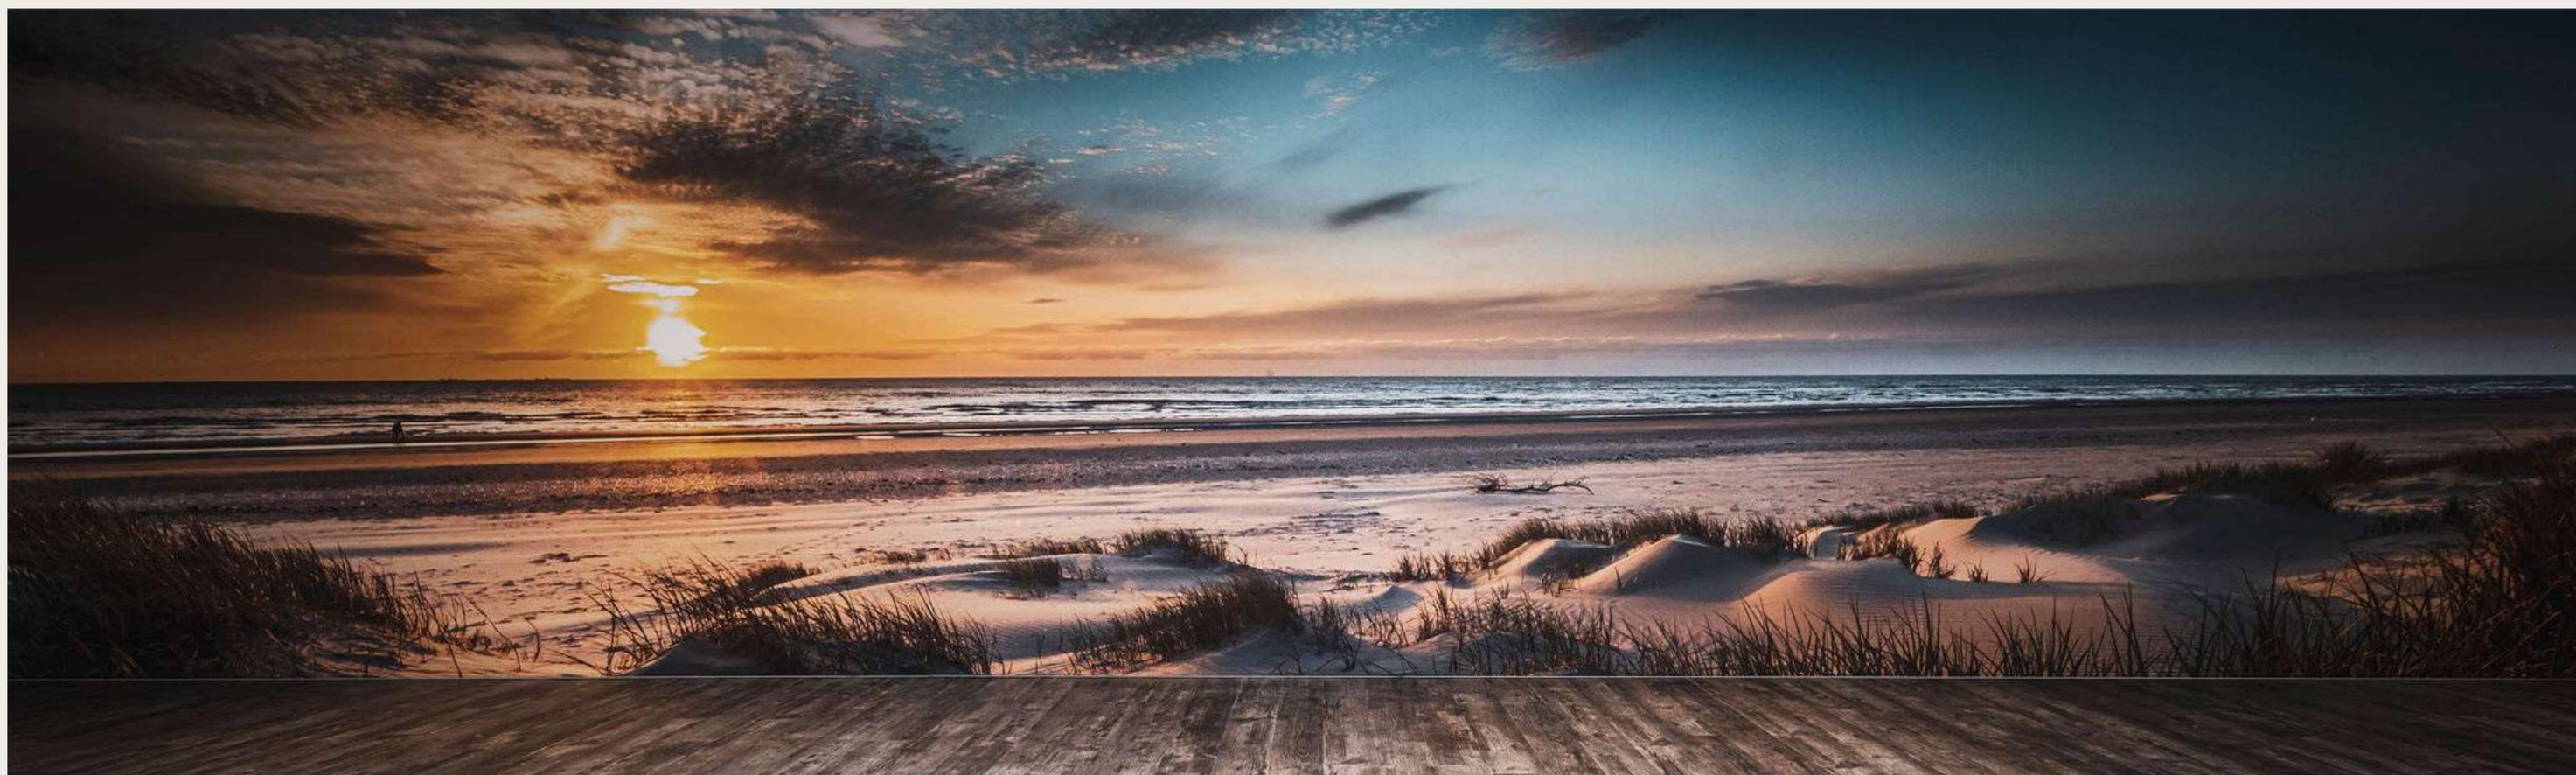

- Visual and non-visual connection with nature
- Dynamic and dispersed lighting
- Proximity to natural processes
- Lower stress levels due the feeling of serenity equals more focus and creativity
